

A G G G T C A

The image displays the DNA sequence 'AGGGTCA' in a stylized, bold font. The letters are arranged in a single line. The 'A' at the beginning is light green. The three 'G's in the middle are dark blue. The 'T' is a medium blue. The 'C' is a teal color. The 'A' at the end is light green. Below the main sequence, there is a reflection effect where the letters are mirrored and slightly offset, creating a 3D appearance. The reflection colors are inverted or slightly different shades of the original colors. The 'G' at the end of the reflection is partially cut off by the right edge of the image.
