

G
T **A** **A** **C** **A**

A stylized DNA sequence logo. The letters are arranged in two rows. The top row contains a large, dark blue 'G'. The bottom row contains a dark blue 'T', followed by three light green 'A's, a teal 'C', and another light green 'A'. Below the two 'A's and the 'C' in the bottom row are two overlapping circular bases, also in dark blue, suggesting a double-stranded structure.
